Subject: Re: Logon - Security Violation Posted by denny on Thu, 10 Apr 2008 19:58:45 GMT View Forum Message <> Reply to Message

Yes, the password fields are encrypted on MNU_USER. Just, one row I added is not encrypted

On MNU_CONTROL: I updated field_value to 'N' and I could log on. Is that correct or you can give me any suggestion about that record?

record_id = SYSTEM field_id = PSWD_ENCRYPT field_value = Y

cheers
