Subject: Login by email - case sensitivity Posted by gpatti on Thu, 10 Sep 2009 09:47:58 GMT View Forum Message <> Reply to Message

Tony,

Just noticed a funny when logging in using email address. If the user doesn't match the case exactly (e.g. accidentally puts a capital first letter) the system finds the user record (can tell this because the user\_id gets displayed) but reports the error A record already exists with this key.
