Hi,

Is not deployed on Windows, but on Ubuntu (Debian Linux). Thus, I assume it has to be (dot)htaccess.

Now, is working, I did a change in the config.inc (dbprefix to be null):

ORIGINAL

```
} else {  
    // this is for my shared web host  
    $GLOBALS['dbusername'] = 'dan';  
    $GLOBALS['dbuserpass'] = 'password';  
    $GLOBALS['dbprefix'] = '****';
```

ORIGINAL

```
} else {  
    // this is for my shared web host  
    $GLOBALS['dbusername'] = 'dan';  
    $GLOBALS['dbuserpass'] = 'password';  
    $GLOBALS['dbprefix'] = null;
```
