Thanks for replying. It is a local server.

Av now edited my php.ini in /etc/php5/apache2.
Only the display_errors was off and av turned it to on. Now I get the error message below.

Warning: require(include.general.inc): failed to open stream: No such file or directory in /srv/www/htdocs/radicore/menu/logon.php on line 25 Fatal error: require(): Failed opening required 'include.general.inc' (include_path='.:/usr/share/php5:/usr/share/php5/PEAR') in /srv/www/htdocs/radicore/menu/logon.php on line 25

Please help
Thanks
