Tony,

In page  
<http://www.tonymarston.co.uk/aboutme/history.html>

the validators found 4 errors:

An incorrect "special" dash:  
Line 306, character 96:

Error: illegal character number 150

Line 657, character 61:

Error: illegal character number 150

Line 572, character 24:  
<table border="1" width="100%" summary="">  
Error: there is no attribute width for this element (in this HTML version)

Line 707, column 59  
Error: & did not start a character reference. (& probably should have been escaped as &amp;.)  
nter.php?noshow&page=/aboutme(

(the others are warnings about XML syntax not worth fixing.)

Thanks.
