Tony, I was thinking of assigning possibly more than one role, each one with mutually exclusive tasks (not with duplicated tasks).

For example, having these roles:

- *read_and_search
- *create and modify
- *delete

Or these roles:

- *good and services
- *stock control
- *sales
- *shipping
- *human resources

I think the problem of multiple starting tasks can be solved having a hierarchy of roles.

Thanks.
