Id there a file missing in the because now i get a undefined reference for function

include.xml.php4.inc:1116: $id = removeTableSuffix($id);
include.xml.php5.inc:1114: $id = removeTableSuffix($id);

Greetings.

Btw. I got the error because the enum field in my case is hidden, and i was setting it in the _cm_pre_insertRecord function to the first value from yhe fieldspec['enumfield']['values'] array.

Greetings
