I also can't find these missing files. I used the prefix htm\_db\_ but I changed it in htm\_ only. I also searched the mnu\_menu and the mnu\_task table for these entries but I didn't find any of them.

Copying and renaming the files from htm\_kontakte\_typ(list1).php to htm\_db\_kontakte\_typ(list1).php and x\_tree\_type(list1).php to htm\_db\_tree\_type(list1).php should remove the error messages. These were the names of the files before the change.

I also included the sql files of them menu, dict and htm database in the htm.zip file. In htm.sql are all the tables with all data.
