```
Just discovered another case that my original proposal did not solve. 
$where = " test_id < 3";(With a space before 'test_id')
```

This results in

Fatal Error: Cannot extract token from: 'test\_id < 3' (# 256)
Error in line 6993 of file 'D:\Pet\UwAmp\www\rad186\includes\include.library.inc'.

To take care of such cases, I would like to modify my original proposal to ... \$input = \$where;

// Add this line to solve "Cannot extract token from" error: \$where = trim(preg\_replace("\\s+\/", " ", \$where));

\$output = array();

while (!empty(\$where)) {
