Subject: REVISED\_DATE and REVISED\_USER not being updated Posted by AJM on Mon, 22 Jan 2007 18:37:57 GMT View Forum Message <> Reply to Message

Each time you update a record through the framework then REVISED\_DATE and REVISED\_USER should automatically be updated. This will only work if you have set the AUTO-UPDATE option for those fields in the data dictionary, and have exported those details to your application.

If you look in your '.dict.inc' file and do not see 'autoupdate'=> 'y' in the array for the REVISED\_DATE and REVISED\_USER fields it means that you have not instructed the framework to update these fields.
