I checked the type in `_cm_change_config()`. The fieldspec is 'date'.

What is the correct code in `_cm_post_fetchRow()` to call `formatDate()` in `std.table.inc`?

Is it: `$fieldarray['training_datum'] = $this->formatData($fieldarray['training_datum']);`

Does the `formatDate()` method automatically recognize the user settings in `config.inc` or in Menu System/languages? Or do I have to tell the `formatDate()` the output formatting?
