I have already shown you how to generate a horizontal line. The documentation already shows how you can out an image in a line. There is code in the EXAMPLE prototype whichs this.

If each line in the report has its own 'multiN' record, but if you do not want anything output (not even a blank line) then set $outarray to FALSE or an empty array. If there is anything in $outarray at all then a line will be printed, even if it is blank.
