In the tutorials you have demonstrated of validation of data is done.

In radicore how do you process business rules before a screen is displayed (ie. enquire, add, delete and etc...).

Some examples:

1. If an invoice is posted, set checkbox to readonly on list screen

or

2. If an invoice is posted, set some fields in the detail screen to read only.

3. Color a the row of record red if overdue in list screen

Do you have an example?
