Subject: Business Rules and Display
Posted by stephenboey on Mon, 05 Feb 2007 16:46:02 GMT

In the tutorials you have demonstrated of validation of data is done.

In radicore how do you process business rules before a screen is displayed (ie. enquire, add, delete and etc...).

Some examples:
1. If an invoice is posted, set checkbox to readonly on list screen
or
2. If an invoice is posted, set some fields in the detail screen to read only.
3. Color a the row of record red if overdue in list screen

Do you have an example?
