[View Forum Message](#) <> [Reply to Message](#)

Subclass generated correctly.

I will post another related problem here so that it is easier to trace.

1. I updated some child records to role_id_snr = 'GLOBAL' to test.
When I click on navigation link to LIST2.

LIST2 has no master shown

2. When I select a child record using checkbox -> click on update. It says nothing selected for
POPUP screen.

I have attached the files.
