What is the relationship between 'kontakt_stamm_verbaende_art_id' and 'verbaende_art_id'?
Which is returned from the popup form and which is saved in your \$fieldarray?
Which do you NOT want stored in your \$fieldarray?

If you want the value for 'verbaende_art_id' stored as 'kontakt_stamm_verbaende_art_id' and not 'verbaende_art_id' then you must remove it from \$select_array before you exist from _cm_popupReturn().
