Instead of drawing lines I would have another solution:

To do this I would have to put a field over an image. However, the field is displayed either above or below the image. Depending on how I fill out the structure file.

```
$structure['multi10']['fields'][1][] ...
```

```
$structure['multi10']['fields'][2][] ...
```

Is it possible to layer one on top of the other?

I have attached a drawing.
