Subject: Audit\_trn task\_id field too small

Posted by [johandewit](#) on Tue, 20 Jun 2006 07:28:20 GMT

[View Forum Message](#) <> [Reply to Message](#)

---

In audit\_trn, task\_id = varchar(32)

In the menu database, task\_id = varchar(40)

When task\_id length > 32, this gives a validation error

task\_id[0]:field cannot exceed 32 characters

Solution

Change table definition audit\_trn.task\_id(varchar(40))

This is still in version 1.90

Greetings

johan

Whoops! Thanks for spotting that. I'll get it fixed straight away (if not sooner).
