When I start upgrade my instalation on 1.33, I found in
/radicore/menu/sql/mysql/alter_table(2008-01-03).sql
sql instruction :

ALTER TABLE 'mnu_role_taskfield' DROP INDEX task_id_2;
Parser could not execute this ALTER TABLE because couldn't find task_id_2!

In /radicore/menu/sql/mysql/menu-shema.sql I found
CREATE TABLE .....
KEY 'task_id' ('task_id')

Is it necessary to drop index ('task_id') ????
