I must be doing something wrong because in post_insertRecord I get a NULL value for $fieldarray['participante_id'];
Any idea why?

```
 function _cm_validateInsert($rowdata){

  $part = new participante;
  $existe_participante = $part->getCount("catsalut='".$rowdata['catsalut']."'");

  if ($existe_participante > 0){

   $this->messages['participante_existe'] = "Participante ya dado de alta en el sistema, no se han
modificado datos existentes";
   return null;
  }
  return $rowdata;
 }

 function _cm_post_insertRecord($fieldarray)

 {
  require_once 'classes/entidad.class.inc';
  $entidad = new entidad;
     $entidad->sql_select = 'entidad_id';
  $entidad_id = $entidad->getData("nombre='" .$_SESSION['role_id'] ."'");

        require_once 'classes/part_ent_xref.class.inc';
  $part_ent_xref = new part_ent_xref;
  $insert_array['participante_id'] = $fieldarray['participante_id'];
  $insert_array['entidad_id'] = $entidad_id[0]['entidad_id'];

  $insert_array = $part_ent_xref->insertOrUpdate($insert_array);

  if ($part_ent_xref->errors){
   $this->errors = $part_ent_xref->errors;
   return $fieldarray;
  }
  return $fieldarray;
 }
```
