Subject: How to change node_desc in Tree_structure (TREE2)

Hi Tony,

I try to put new column in teee_node table node_desc_long, and to put in tree_structure.list.screen.inc, but it is not working. I investigate and find that in _cm_GetNode you put select with join, where I found node_desc ...Which changes and where is necessary, I have to make, for this purpose (to have new column node_desc_long instead of node_desc) in List structure screen.

Thanks in advance
