Subject: Error with date in dd/mm/yyy format

I've configured radicore to use this date format: dd/mm/yyyy
I think there is a bug around line 85 in std.datevalidation.class.inc

With the debugger I found that when updating a date field it executes this code in line 89:
$result = $this->verifyDate($regs[3], $regs[1], $regs[5]);
So it passes the month as day, and therefore date verification fails.

This is the data I got with the debugger:
$this->date_format=dd/mm/yyyy
$input=24/01/2009
regs[1]=24
regs[3]=01
regs[5]=2009
