Before posting I looked at that example and tried placing it there, but it didn't work.
If I put this code:

```
$structure['title'][] = array('image' => 'images/radicore.jpg',
                              'imagewidth' => 84,
                              'imageheight' => 45);
```

the image is displayed, but with this:

```
$structure['multi1']['fields'][6][] = array('image' => 'images/radicore.jpg','imagewidth'  =>30,

 'width' => 20, 'align' => 'center','x'=> 5
);
```

the image isn't displayed
could it be that the 'image' doesnt work with multi?
