Here's the fix:

In file 'include.session.inc' at line 1028 change

```
    if (isset($_SESSION['page_stack'])) {
     // remove any redundant entries in $_SESSION['page_stack']
        $_SESSION['page_stack'] = comparePageStacks($_SESSION['page_stack'], $page_stack);
    } // ifto
    if (isset($_SESSION['page_stack'])) {
        if (basename($PHP_SELF) == 'help.php') {
            // continue
        } else {
            // remove any redundant entries in $_SESSION['page_stack']
            $_SESSION['page_stack'] = comparePageStacks($_SESSION['page_stack'],
$page_stack);
        } // if
    } // if
```
