Thanks Tony

Here is my srisri.dict.inc

I compared this to an existing working dict.inc, and looks identical.

Hari

```
<?php
   // file created on August 4, 2006, 4:12 pm

   // field specifications for table aol.srisri
   $fieldspec['id']                    = array('type' => 'integer',
                                       'size' => 4,
                                       'auto_increment' => 'y',
                                       'minvalue' => -32768,
                                       'maxvalue' => 32767,
                                       'pkey' => 'y',
                                       'required' => 'y');

   $fieldspec['date']                   = array('type' => 'date',
