Hi Tony,

Took the patch for a test spin and it had a problem. When it's evaluating the multiple 'OR' cases, the arcs are pulled from the DB in alphabetically order. Depending on the order you might get the code to evaluate:

Pre-condition
Default case
Pre-condition

versus

Pre-condition
Pre-condition
Default case

I fixed this by modifying the code to order by 'pre_condition DESC, place_name ASC'. It on line 139 of workflow_engine.class.inc.

Once I fixed that problem the testing was positive. It looks like a good enhancement.

Cheers,

Kyle Brost
