You must modify the details for these fields in the data dictionary as follows:

created_date = noedit, autoinsert
created_user = noedit, autoinsert
revised_date = noedit, autoupdate
revised_user = noedit, autoupdate

Don't forget to export these changes to your application afterwards.

If you examine the dictionary contents for other database tables which have these columns you will see exactly what is required.

All this information is documented in http://www.tonymarston.net/php-mysql/data-dictionary.html and http://www.tonymarston.net/php-mysql/menuguide/dict_column(u pd).html
