Hi,

I was using Radicore in Windows XP and everything was ok.
Thus, I decided to install it on an Ubuntu server:
ubuntu: 10.04
mysql: 5.1.41-3ubuntu12.6 (Ubuntu)
PHP Version 5.3.2-1ubuntu4.7
apache2

I have 2 problems:

1. although I changed .htaccess as described in the installation, the PHP would not include the Radicore path. Thus, I had to extend the include path in php.ini and seems to work. I attach the .htaccess file, maybe I do something wrong...

2. after "solving" step 1, I still get an error from the framework (Fatal Error: mysqli_connect(): Cannot connect to database '%1$s'..). Is in the second part of the attached file.

Thanks!
Dan Stanescu
