This is actually a bug

The fix is as follows - in file 'include.session.inc' is a function called 'scriptNext()', and at line 2153 (or thereabouts) you shoud see the following code:

```
if (!empty($current_task)) {
   $script_vars['current_task'] = $current_task;
} // if
```

Change this to the following:

```
$script_vars['current_task'] = $GLOBALS['task_id'];
```

Try this and check that it works OK.
