Tony, some more:

In the page
http://www.radicore.org/glossary.php
the link to htp://www.oracle.com (Line 384) (with one t)
should be changed to
http://www.oracle.com

Also in
http://www.radicore.org/glossary.php
the following anchors are duplicated:
rls - lines 966 and 974
rbac - lines 931 and 970
vpd - lines 1136 and 1151

Also, in page http://www.tonymarston.net/php-mysql/radicore-front-end.html
line 96
Files in one application can be accessed by the other by means of modifications to the include_path in htaccess files. The front-end should use an include_path which specifies directories in the following order:

the link to http://uk2.php.net/manual/sl/ini.sect.path-directory.php
is not working.

Thanks.
