Tony,

The broken link to
http://php.net/manual/en/function.mysqli.insert-id.php
linked from page:
http://www.php.net/manual/en/function.mysqli.insert-id.php
can be replaced with
http://php.net/manual/en/mysqli.insert-id.php

The broken link to
http://www.php.net/manual/hk/ini.sect.data-handling.php
or http://php.net/manual/hk/ini.sect.data-handling.php
linked from page:
http://www.radicore.org/viewarticle.php?article_id=64

is broken.

(Why language hk and not en?)

RADICORE works with default_charset <LINK> set to "UTF-8" which means that data containing accented characters can be used without requiring the multi byte string functions to be enabled. Again there is a setting in the .htaccess file which overrides anything which is set in your php.ini file.

The broken link to
http://www.objectmentor.com/resources/articles/dip.pdf
linked from page
 http://www.tonymarston.net/php-mysql/not-so-solid-oo-princip les.html
can be replaced with
 http://web.archive.org/web/20110714224327/http://www.objectm
entor.com/resources/articles/dip.pdf

The broken link to
http://www.objectmentor.com/resources/articles/isp.pdf
linked from page:
 http://www.tonymarston.net/php-mysql/not-so-solid-oo-princip les.html
can be replaced with
 http://web.archive.org/web/20110714224545/http://www.objectm
entor.com/resources/articles/isp.pdf

Thanks.
