Tony,

I checked one page of the sample application
http:// www.tonymarston.net/sample/person_list.php?session_name=samp le
with the W3C Markup Validation Service (http://validator.w3.org/).

The service found one markup error.

Checked as XHTML 1.0 and XHTML 1.1
==========

ERROR 1

Error document type does not allow element X here; missing one of Y start-tag
---------- ----------

The mentioned element is not allowed to appear in the context in which you've placed it;
the other mentioned elements are the only ones that are both allowed there and can contain the element mentioned.
This might mean that you need a containing element, or possibly that you've forgotten to close a previous element.

One possible cause for this message is that you have attempted to put a block-level element (such as "<p>" or "<table>") inside an inline element (such as "<a>", "", or "<font>").

Line 209, column 68: document type does not allow element "input" here;
missing one of "ins", "del", "h1", "h2", "h3", "h4", "h5", "h6", "p", "div", "address", "fieldset" start-tag

<input type="hidden" name="session_name" value="sample" />

Thanks.
