Tony,

In the calendar, if you enter a letter, for example 'a'
http://www.tonymarston.net/php-mysql/calendar.php?year=a
the following (two) message(s) appears:

Year must be an integerYear cannot be less than 1970

I think

Year must be an integer. Year cannot be less than 1970.

would be grammatically correct (and valid XHTML).

Thanks.

PS. To avoid error messages such as:
Line 20, column 1: character data is not allowed here
Year must be an integerYear cannot be less than 1970</form>
