Tony,

This is a different bug but also happens in connection with the sorting links.

Now the searched term gets "remembered" and the search result displayed when a new sort order is requested.

For example:
1) Go to "Search PERSON" http://www.tonymarston.net/sample/person_search.php
2) In the "First Name" field enter "James"
3) Press SUBMIT
4) In the List PERSON screen only the James Bond record (Id 007) is displayed
5) Press RESET
6) Ten records are displayed (from PA to SF)
7) Click on any column heading/hyperlink (e.g. http://www.tonymarston.net/sample/person_list.php?session_na me=sample&orderby=person_id)
8(Only the 007 record is displayed, instead of the second set of 10 records.

Thanks.
