Fixed. Although the URL http://www.tonymarston.net /sample/person_list.php?csxslt=on reports a warning this is misleading as the option 'csxslt=on' causes an XML document to be sent to the browser, which is then transformed into HTML using an XSL stylesheet. Validating an XML document BEFORE it has been transformed will produce different results if you try AFTER it has been transformed. Just remove the 'csxslt=on' option and you will see the difference.
