Tony,

There is an html error in
http://www.tonymarston.net/php-mysql/web-site-vs-web-applica tion.html

See
http://validator.w3.org/nu/?doc=http://www.tonymarston.net/p
hp-mysql/web-site-vs-web-application.html

Reference
http://www.w3.org/TR/REC-html40/struct/tables.html#h-11.2.4. 4 (Calculating the width of columns)
http://www.w3.org/TR/REC-html40/struct/tables.html#h-11.2.4. 2 (the col element)
http://www.w3.org/TR/REC-html40/types.html#type-length (length and multilength)

The acceptable syntax has three variants (each with a different meaning):
width=n (e.g. width=50) (lenght - pixels)
width=n% (e.g. width=20%) (lenght - a percentage of the available horizontal space)
width=i* (e.g. width=30*) (multilength)

Thanks.

PS.
The 10px syntax is valid in CSS, see
http://www.w3.org/TR/CSS2/syndata.html#value-def-length
