Tony,

In the following pages
http://www.tonymarston.net/php-mysql/design-patterns-are-dea d.html
http://www.tonymarston.net/php-mysql/radicore-and-javascript.html
http://www.tonymarston.net/php-mysql/radicore-security.html
http://www.tonymarston.net/php-mysql/singleton.html
http://www.tonymarston.net/php-mysql/stateless-protocol.html
http://www.tonymarston.net/sample/index.html
there are tables that contain rows that exceed the column count established using colgroup or col elements,
and
they are using legacy HTML 4.0 Transitional doctype, instead of HTML 4.01 Transitional.

See
