Tony,

It's okay to leave it as it is.
Changing it is more of a preventive measure.

The server gives a 301 status code (permanent redirect).

That means that perhaps, some time from now, the
http://www.lsd.ic.unicamp.br/~oliva/fun/prog/resign-patterns URI
will stop working and only
http://www.fsfla.org/~lxoliva/fun/prog/resign-patterns
will work.

That's why I suggest the change as a preventive measure.

See
http://validator.w3.org/checklink?uri=http://
www.tonymarston.net/php-mysql/design-patterns.html&hide_ type=all&depth=&check=Check

Thanks.
