If I choose only one record for the pdf list there the following info: string '' (length=21), if I want to print all there is: string'' (length=63).
I get these information by adding the following lines in the tcpdf_php5.php:

```
public function Output($name='doc.pdf', $dest='I') {
 //Output PDF to some destination
 //Finish document if necessary
 $out1 = ob_get_contents();
 var_dump($out1);
```
