I also can't find these missing files. I used the prefix htm_db_ but I changed it in htm_ only. I also searched the mnu_menu and the mnu_task table for these entries but I didn't find any of them.

Copying and renaming the files from htm_kontakte_typ(list1).php to htm_db_kontakte_typ(list1).php and x_tree_type(list1).php to htm_db_tree_type(list1).php should remove the error messages. These were the names of the files before the change.

I also included the sql files of them menu, dict and htm database in the htm.zip file. In htm.sql are all the tables with all data.
