Here are just a few examples:

Example 1
```
   $where = "test_id  < 3 ";(With tabs between 'test_id' and '<' )
```

Example 2
```
   $where = "test_id <
     3 ";
```
Example 3
```
   $where = "  test_id < 3";(With tabs before 'test_id')
```

Example 4
```
   $where = "
     test_id < 3";
```
Example 5
```
   $where = "test_id < 3";
```
Examples 1 and 2 both result in
```
   Fatal Error: Cannot extract token from: '< 3' (# 256)
   Error in line 6994 of file 'D:\Pet\UwAmp\www\rad186\includes\include.library.inc'.
```

Example 3 and 4 both result in
```
   Fatal Error: Cannot extract token from: ' test_id < 3' (# 256)
   Error in line 6994 of file 'D:\Pet\UwAmp\www\rad186\includes\include.library.inc'.
```

Example 5 functions normally without errors.
