I think the HTML output should be like the following sample:

```
<video id="sampleMovie" width="640" height="360" preload controls>
 <source src="HTML5Sample_H264.mov" />
 <source src="HTML5Sample_Ogg.ogv" />
 <source src="HTML5Sample_WebM.webm" />
</video>
```

I read a little bit about playing video on the web and do now know that it is not simple. I hope that you have the information/answer which you wanted.
