I checked the type in _cm_change_config(). The fieldspec is 'date'.

What is the correct code in _cm_post_fetchRow() to call formatDate() in std.table.inc?

Is it: $fieldarray['training_datum'] = $this->formatData($fieldarray['training_datum']);

Does the formatDate() method automatically recognize the user settings in config.inc or in Menu System/languages? Or do I have to tell the formatDate() the output formatting?
