Can I output a horizontal line in the title of a report and if yes, how?

I tried the following: I defined a (calculated) cell and want to show the 'Bottom' border but I don't succeed. Is there a different possibility?

Here is the code:

```
// define contents of page title
$structure['title'][] = array('text' => '%%datum_output',
   'width' => 190,
                    'border' => 'b',
   'newline' => 'y');
```
