The image is now visible in the output. The problem was that the image in the first row was covered by the first lines of the second row. After setting 'y_relative' in the next line on a higher value the picture is now visible.

I tried to solve the multiN problem in the following way:

In report.inc I defined multi2

```
$structure['multi2']['fields'][1][] = array('multi2_type' => 'multi2_value');
```

In the class file I defined multi2 as follows:

```
case 'multi2':
  $row['multi2_type'] =  'field';
  $row['multi2_value'] =  "'Label 02: ', 'width' => 17, 'border' => '', 'style' => 'label_tplan');";

  $outarray[] = $row;
```

But all I get are two empty fields with borders. Is this the right way?
