You mean in the screen structure file?

$structure['main']['fields'][] = array('video' => 'Video', 'imageheight' => 250, 'imagewidth' => 300, 'nosort' => 'y');

If I change here ... array('video' => ... into ...array('image' => ... the error doesn't appear but you don't see a picture.

The 'video' tpye causes the error.
