Deleted all screens and redo again.

When I selected a child record for update on mnu_role(list2)snr.php screen error message says "Nothing selected from popup screen."

I traced it to the _cm_popupCall() of mnu_role_jnr.class.inc. Seems like it is not going in there. Something is missing.

Created
1. mnu_role(list2)snr -> Update2, Popup2, Delete3, Search -> Added to mnu_role(list) Navigation button
2. mnu_role(list2)jnr -> Update2, Popup2, Delete3, Search -> added to mnu_role(list2)snr Navigation button
3. mnu_role(popup2)jnr -> Added mnu_role(add2) to Navigation button

The codes in snr and jnr are quite close to Tutorial 4, just changed the variable names.

I've attached the related files and a screenshot.
