I have tried setting my PCÂ´s language to Spanish, and my browser language to Spanish, but I cannot reproduce this fault. Radicore can only support other languages when they have supporting files in the text direcory. Your error message clearly shows that it was looking for the sys.language_text.inc file in the 'menu/text/en' directory, and as that file exists that error should not appear.

You may need to add English as an optional language in your browser.
