I have commented the code about CSRF and it seems to be right by now.
It seems there is a bug when execute scriptNext() function, analyzing my code the errors appears with this lines:

```
if (isset($_POST['submitnext']) || isset($_POST['submitstay'])) {
	$_SESSION['idcliente'] = $rowdata['idcliente'];
	$next['task_id'] = 'buzz_venta(add4)';
	append2ScriptSequence($next);
}
```

and ....

```
if ($GLOBALS['task_id'] == 'buzz_venta(add2)' || $GLOBALS['task_id'] == 'buzz_venta(add4)'){
	$idventa = $rowdata['idventa'];
	$_SESSION['idventa'] = $rowdata['idventa'];
	$next['task_id'] = 'buzz_detalleventa(multi4)';
	append2ScriptSequence($next);
}
```
