I've configured radicore with the following setting. I am a window user.

PHP 5 and above and Apache version 2.4

1 => Include path in htacess file. My xampp in installed on D drive
php_value include_path ".;D:\xampp\htdocs\radicore\includes"

2=> changing in php ini file. The include path in htacess and php ini files must be the same.
include_path = ".;D\xampp\htdocs\radicore\includes"

3=> changing in httpd.conf file
<Files "htaccess.txt">
    Require all denied
</Files>

and

<Directory "D:/Apache2/htdocs">
    AllowOverride All
    Require all granted
</Directory>

Also uncomment xsl extension in php ini file.
